Hiring Manager

Ostdaily

Karachi, Pakistan

Subject: Application for Frontend Developer (Angular) – Night Shift

Dear Hiring Manager,

I am excited to apply for the Frontend Developer position at Ostdaily. With over 3 years of professional experience as a MERN Stack Developer and strong expertise in modern JavaScript frameworks, I have built and maintained responsive, high-performance web applications that prioritize user experience and maintainability. While my core work has been in React, I have also worked with Angular on projects requiring scalable front-end architecture, TypeScript, and RESTful API integration.

In my recent projects, I collaborated closely with designers, back-end developers, and product managers to deliver polished interfaces, ensuring pixel-perfect responsiveness from Figma to deployment. My proficiency in HTML, CSS, JavaScript, TypeScript, and API integration enables me to develop applications that are both aesthetically pleasing and highly functional. I am meticulous about clean, maintainable code and have participated in numerous peer code reviews to uphold best practices.

I am particularly drawn to Ostdaily's focus on healthcare technology and am eager to contribute to solutions that make a tangible impact. My attention to detail, adaptability to new frameworks, and commitment to performance optimization align well with your requirements for delivering seamless and secure healthcare applications.

I would welcome the opportunity to discuss how my skills can contribute to your team's success. Thank you for considering my application, and I look forward to the possibility of working with Ostdaily.

Best regards,

Ahmed Raza
